- Panel discussion titled, "Resistant to Resistance: Approaches to Address Resistance in Oncology", on September 28th at 11:30am ET

### About Tyra Biosciences

Tyra Biosciences, Inc. is a precision oncology company focused on developing purpose-built therapies to overcome tumor resistance and improve outcomes for patients with cancer. TYRA's proprietary in-house discovery platform, SNÁP, enables the rapid and precise refinement of structural design through iterative molecular SNÁPshots that help predict genetic alterations most likely to cause acquired resistance to existing therapies. Leveraging SNÁP, TYRA is developing a pipeline of selective inhibitors of Fibroblast Growth Factor Receptors (FGFR), which are altered in approximately 7% of all cancers. TYRA-300 is an FGFR3 selective inhibitor for oncology. TYRA-200 is an FGFR2 inhibitor that TYRA is developing initially in intrahepatic cholangiocarcinoma. TYRA is also targeting achondroplasia and other FGFR3-related skeletal dysplasias and FGFR4 and REarranged during Transfection kinase (RET) related cancers. TYRA is based in Carlsbad, CA. For more information about our science, pipeline and people, please visit [www.tyra.bio](http://www.tyra.bio) and engage with us on [LinkedIn](#).
