

Tyra Biosciences to Participate at Upcoming Investor Conferences

CARLSBAD, Calif., May 12, 2025 /PRNewswire/ -- Tyra Biosciences, Inc. (Nasdaq: TYRA), a clinical-stage biotechnology company focused on developing next-generation precision medicines that target large opportunities in Fibroblast Growth Factor Receptor (FGFR) biology, today announced that management will participate in the following investor conferences:

- Bank of America Global Healthcare Conference, May 13-15, 2025
 - Format: Fireside chat and one-on-one investor meetings
 - Presentation Date/Time: Tuesday, May 13, 2025, at 5:15 PM PT
 - Location: Las Vegas, NV
- Jefferies Global Healthcare Conference, June 3-5, 2025
 - Format: One-on-one investor meetings
 - Location: New York, NY
- UBS Biotech 1x1 Symposium, June 24, 2025
 - Format: One-on-one investor meetings
 - Location: New York, NY

A live and archived webcast of the fireside chat will be available via the [For Investors](#) page on the Investor section of the TYRA website.

About Tyra Biosciences

Tyra Biosciences, Inc. (Nasdaq: TYRA) is a clinical-stage biotechnology company focused on developing next-generation precision medicines that target large opportunities in FGFR biology. The Company's in-house precision medicine platform, SNĀP, enables rapid and precise drug design through iterative molecular SNĀPshots that help predict genetic alterations most likely to cause acquired resistance to existing therapies. TYRA's expertise in FGFR biology has created a differentiated pipeline with three product candidates in clinical development in targeted oncology and genetically defined conditions. The Company's lead precision medicine stemming from SNĀP, TYRA-300, is a potential first-in-class selective FGFR3 inhibitor that is designed to avoid the toxicities associated with inhibition of FGFR1, FGFR2 and FGFR4, while being agnostic for the FGFR3 gatekeeper mutations. TYRA-300 is expected to be evaluated in three Phase 2 studies: SURF302 for IR NMIBC, BEACH301 for pediatric achondroplasia and SURF301 for metastatic urothelial cancer. TYRA is also developing TYRA-200, an oral, investigational, FGFR1/2/3 inhibitor, in the SURF201 study for metastatic intrahepatic cholangiocarcinoma, and TYRA-430, an oral, investigational FGFR4/3-biased inhibitor for FGF19+/FGFR4-driven cancers. TYRA is based in Carlsbad, CA.
